

Establishing Joint Solutions to Address Current and Future Small UAS Threats

Presented by

MG Sean Gainey

Director of the Joint Counter-small
Unmanned Aircraft Systems Office (JCO)

Director of HQDA Fires

Overall Classification: UNCLASSIFIED

UNCLASSIFIED

The Evolving Threat of Small UAS

Technology Trends

Rapidly advancing and proliferating UAS technology can be adapted into surveillance or weapons systems that pose a security threat—to both our military and our civilian population.

Longer Battery Life

Extended Range

Increased Payload

Sensor Miniaturization and Enhanced Autonomy

Sensor Fidelity/Visual Acuity

Boosted Speed and Performance

Intelligence, Surveillance, and Reconnaissance (ISR)

UAS provide operators an opportunity to conduct ISR operations from afar, while maintaining a limited presence and digital/electronic signature.

Kinetic Delivery

Modified Group 1 and 2 and formally designed Group 3 drones are dropping ordnance on infantry, armor, and fixed sites.

One-Way-Attack

Group 1, 2, and 3 UAS—both off-the-shelf and military—are conducting kamikaze attacks on ground targets.

Non-Nefarious

Negligent and/or reckless state and non-state drone operators in the vicinity of infrastructure and installations (both civil and military) pose a safety and security risk.

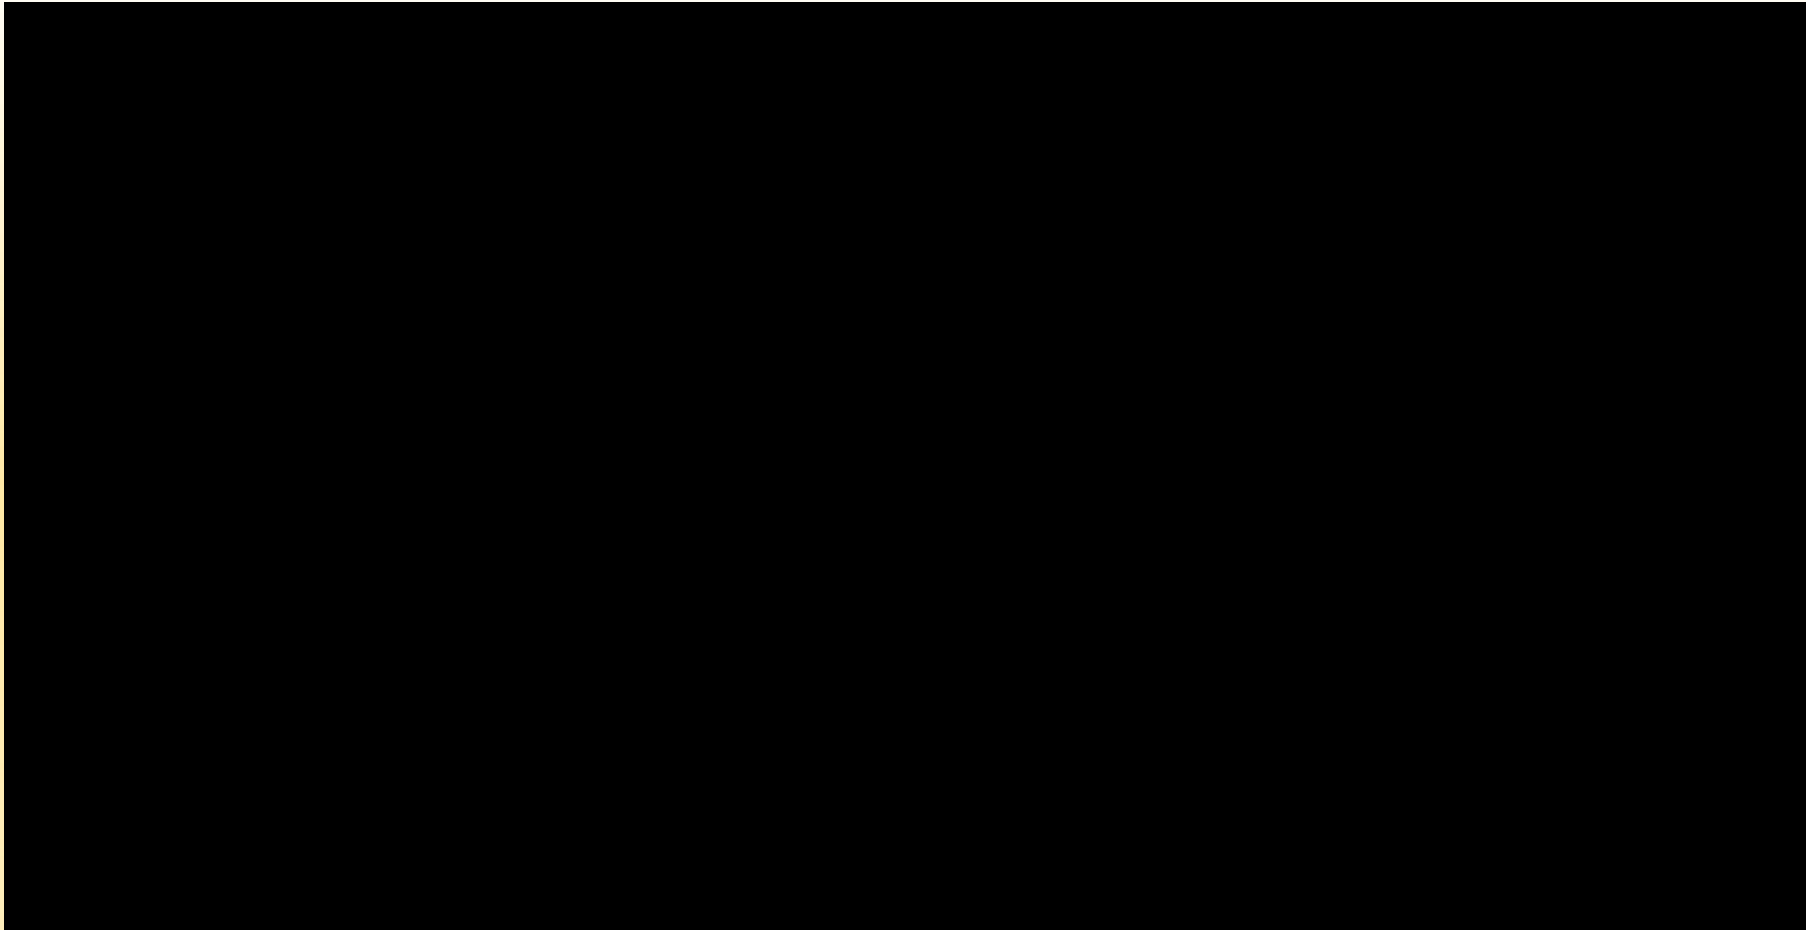

UNCLASSIFIED

Small Drones on the Battlefield

“Everything we’re seeing in Ukraine underscores again the growing drone threat...drones and other unmanned systems are going to pose significant challenges for us..drones are an issue not just overseas, but here at home as well.” -Ms. Christine Wormuth, SECARMY and Executive Agent, DOD C-sUAS

UNCLASSIFIED

Joint C-sUAS Office (JCO) Overview

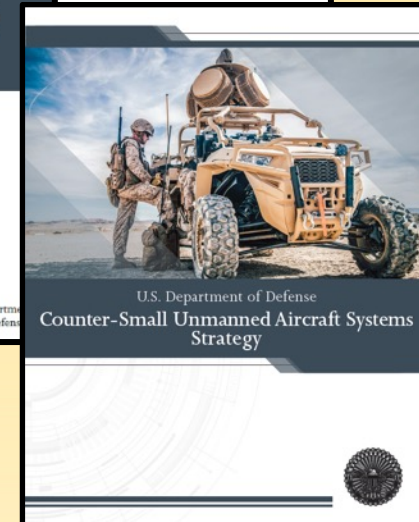

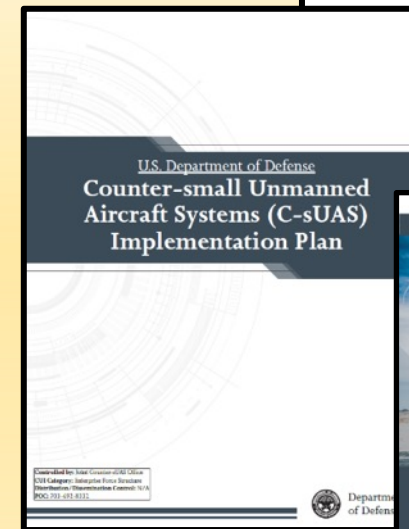

EA Responsibilities (IAW approved DoDD 3800.01E)
SECDEF assigned responsibilities to the EA (SecArmy) to plan, program, and budget for research and development of UAS Groups 1, 2, and 3 C-sUAS capabilities with cost, funding, and expenses shared equitably among Military Services

Functional Areas

- Joint Doctrine
- Joint Requirements
- Joint Materiel Development
- Joint Training

Major Focus Areas

- DoD C-sUAS Strategy
- Joint C-sUAS Operational Requirements
- Joint Training and Doctrine Concept
- Joint C-sUAS Acquisition Strategy
- Common Test Ranges
- Industry Engagement Plan
- US Interagency Coordination/Synchronization
- Allied/Host Nation Coordination/Synchronization

JCO Mission: The Joint C-sUAS Office leads and directs Department of Defense C-sUAS **Doctrine, Requirements, Materiel, and Training efforts and establishes Joint solutions within a common architecture in order to address current and future small UAS threats and enhance warfighter capabilities to deploy, fight, and win against any threat at home or abroad.**

UNCLASSIFIED

Addressing the Threat

Initial Joint C-sUAS Systems

Fixed / Semi-Fixed Site

Mobile / Mounted

L-MADIS

M-LIDS

Command and Control

Dismounted / Handheld

Bal Chatri

SmartShooter

Dronebuster

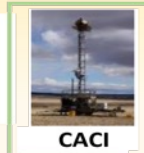

Existing & Developing Systems

- JCO funds research, development, test, & evaluation of counter-swarm & counter-one way attack capabilities
- 10 initial joint counter-small unmanned aircraft systems to left
- JCO continues to fund upgrades & new solutions covering multiple focus areas, including:
 - Command and Control of defensive systems
 - Counter-Group 3
 - Counter-Swarm (e.g., High Energy Laser, High Power Microwave)
 - Electronic warfare
 - Low collateral damage

JCO Demonstrations

- Demo 4, Jun 2023, focus on counter-Group 3 one-way attack (OWA)
- Demo 5, Jun 2024, focus on counter-swarm

Recommended CaaS Systems

Memo 1: Demo 2 recommendations (Nov 22)

- Anduril CaaS system
- Black Sage CaaS system
- CACI CaaS system
- RSGS CaaS system
- SAIC CaaS system

Recommended EW Systems

Memo 2: EW Baseline recommendations (May 23)

- Pulsar (Anduril) †
- Bal Chatri 2 †
- Ninja*
- Titan (Blue Halo)
- CORIAN V1.5 †
- CORIAN V2 †
- EGON (L3Harris)
- DRAKE (NGC)
- Modi (SNC) †
- Modi2 (SNC) †
- FS-LIDS*

* also an original down-selected system

† Variation exists in Initial down-select or CaaS

Emerging Capabilities for Countering Small UAS

It is a DoD priority to protect personnel, material, and missions from the growing threats associated with the rapid increase in UAS technology. DoD will develop integrated plans, technologies, and doctrine, and will focus appropriate resources on countering the UAS threat, while minimizing unnecessary duplication and redundancy. ~ DoDD 3800.01E

C-sUAS Lessons Learned

- The small UAS threat is real and evolving. Advances in hardware and software have enhanced speed and range while making drones more autonomous, more easily acquired, and deadlier.

- There are no silver bullets. C-sUAS requires a layered system-of-systems approach integrated into a common command and control system.

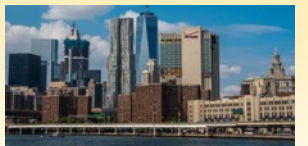

- C-sUAS capabilities consist of more than just materiel solutions. Moreover, it is everybody's responsibility. We must continue to train and educate the Joint force to outpace the threat.

- Enhancing ally and partner interoperability with U.S. forces is imperative.

- The JCO must partner with the services, combatant commands, the interagency community, industry, and academia to continue to outpace the small UAS threat.

- We must be ready to conduct C-sUAS in complex environments, including congested airspaces above populated areas.
